Lighting Design

I have twenty-four years of experience in consulting work. In the span of my career I have worked in electrical design as well as lighting design. I am aware of all the construction codes state wide as well as nationally. I also have experience in the preparation of project documentation, project estimating and field investigation. I am familiar with AutoCAD and most all manufacturers lighting software as well as AGI32 and Lightscape.

Project experience includes building interior and exterior lighting and lighting control design. Project experience includes corporate, commercial, municipal, federal, and industrial as well as biotech facilities.
