

LDL LED Manufacturers Checklist

The LDL LED List is an interim qualifying list while your product is being reviewed by ENERGY STAR or the DLC. Products will be removed 12 months after they are posted to the list. If you want to resubmit the same product after it falls off the list, it MUST have a new LM79 test.

Please read these instructions carefully. Emails with incomplete documents or blanks in the checklist *will be deleted*, and you will be asked to re-submit all documentation. (See back for common reasons submittals are rejected.)

Attach the following 5 documents as a pdf file and email to: ledlist@lightingdesignlab.com. Submit only *one product* per email. Put the mfg. name and model # in the email's SUBJECT line; e.g. *Lucky Loo LED, #LL-P38/827/41K-80*

1. LDL LED Manufacturers Checklist (*this form with data saved AS IS, not scanned.*)
2. LM-79 Report (*Testing lab must be approved by Lighting Facts® - www.lightingfacts.com/approvedlabs*)
3. Product warranty
4. Product spec sheet
5. Proof of safety certification such as UL, ETL or CSA-US (must be NRTL)
6. Product sample in production packaging (*for integral LED lamps only, and within 30 days of submittal*)

Your Name	
Today's Date	
Lamp or fixture type (PAR38, MR16, HID, canopy, linear, etc.)	
Lamp or fixture manufacturer	
Model number – <i>This is the number that will appear on the list!</i>	
SKU number (list "same as" if same as model #)	
Product number (list "NA" if not applicable.)	
<hr/>	
Does it have integrated occupancy, motion, photo or other control? Yes or No (<i>for fixtures only</i>) If Yes, list off-state power.	
<hr/>	
Name of safety certifier (must be UL or equivalent)	
NRTL test number	
Length of Warranty (in years)	
<hr/>	
LM 79 Report – name of testing lab	
LM 79 Report – test number(s)	
LM 79 Report – test date(s)	
LM 79 Report – lamp input voltage	
LM 79 Report – lamp current	
LM 79 Report – lamp wattage	
LM 79 Report – power factor	
LM 79 Report – initial lumen output	
LM 79 Report – efficacy (LPW)	
LM 79 Report – CRI	
LM 79 Report – CCT (Kelvin)	
LM 79 Report – DUV value	
LM 79 Report – THD (<i>where required</i>)	
LM 79 Report – R9 (<i>where required</i>)	
<hr/>	
Spec sheet – rated life	
Spec sheet – dimmable? (Yes or No)	
Spec sheet – lamp wattage	
Spec sheet – CBCP (<i>for directional lamps only</i>)	
Spec sheet – initial lumen output	
Spec sheet – CCT (Kelvin)	

Please allow 3-4 weeks for processing.

Here are some common reasons why submittals are rejected:

1. The most current checklist (found on our website) was not used.
2. The checklist was scanned and then saved as a pdf, instead of being saved and attached in its original form.
3. The model or SKU number on the checklist did not match the model or SKU number on the LM-79 report, UL certification document or the product spec sheet.
4. There were blanks in the checklist.
5. The test report was not from a LM79-certified testing lab.
6. The test report was not in English.
7. The test report was not signed.
8. The test report was not final.
9. Documents were missing (especially warranty and UL report).
10. The email contained documentation for more than one product.
11. Values on the checklist did not match values on the LM-79 report or the spec sheet.
12. Documents that were not required were attached.
13. Attached files were not in pdf format.
14. Values in the checklist were hand-written, not typed.
